Le plugin `af_readability` est bien utile pour télécharger le contenu des articles (à activer dans les paramètres puis pour chaque feed)

L'option `Mark read on scroll` est aussi sympa.

## Thème custom

le thème de base est pas ouf, surtout pour la lecture des articles (un peu la fonctionnalité principale d'un lecteur rss)

OMG! Ubuntu!

## ONLYOFFICE 7.2 Released with Misc New Features & Improvements

Joey Sneddon Sep 27, 17:18

An updated version of ONLYOFFICE is available to download for Windows, macOS, and Linux.

ONLYOFFICE 7.2 ships with all of the latest [changes to the online version](#), plus some 'unique features' exclusive to the desktop editors, including automatic light/dark mode on Windows and macOS (the feature is present on Linux builds but doesn't, in my testing, do what it should).

Such as? Well, the new version of the *Document* has ligature support in text files; lets you easily insert the current heading into a table of contents; and adds a new "Headings" panel to the main toolbar (replacing the navigation panel). Converting .pdf, .djvu, and .xps documents to .docx is also said to have improved.

The *Presentation* tool now supports custom path animations, offers advanced settings, is able to playback audio and video in slides without requiring VLC, and intros advanced "placement" options for images, when selecting an image and choosing 'advanced settings'.
