vue-js

```
{
  // Place your snippets for vue here. Each snippet is defined under a snippet name and has a prefix, body and
  // description. The prefix is what is used to trigger the snippet and the body will be expanded and inserted.
  Possible variables are:
  // $1, $2 for tab stops, $0 for the final cursor position, and ${1:label}, ${2:another} for placeholders.
  Placeholders with the
  // same ids are connected.
  // Example:
  // "Print to console": {
  //   "prefix": "log",
  //   "body": [
  //     "console.log('$1');",
  //     "$2"
  //   ],
  //   "description": "Log output to console"
  // }
  "component": {
    "prefix": "<template>",
    "body": [
      "<template></template>",
      "<script>",
      "import { Fragment } from \"vue-fragment\"",
      "import { bus } from \"../main.js\"",
      "export default {",
      "  props: {",
      "  },",
      "  data() {",
      "    return {}",
      "  },",
      "  mounted() {"
```

```
    "    bus.$on(\"navigation\", () => {",
    "    })",
    "" },",
    "" methods: {},",
    "" components: { Fragment },",
    ""}",
    ""</script>"
  ]
}
```
