vue-js

```
{
// Place your snippets for vue here. Each snippet is defined under a snippet name and has a prefix, body and
// description. The prefix is what is used to trigger the snippet and the body will be expanded and inserted.
Possible variables are:
// $1, $2 for tab stops, $0 for the final cursor position, and ${1:label}, ${2:another} for placeholders.
Placeholders with the
// same ids are connected.
// Example:
// "Print to console": {
//   "prefix": "log",
//   "body": [
//     "console.log('$1');",
//     "$2"
//   ],
//   "description": "Log output to console"
// }
"component": {
  "prefix": "<template>",
  "body": [
    "<template></template>",
    "<script>",
    "import { Fragment } from \"vue-fragment\"",
    "import { bus } from \"../main.js\"",
    "export default {",
    "  props: {",
    "  },",
    "  data() {",
    "    return {}",
    "  },",
    "  mounted() {"
```

```
    "    bus.$on(\"navigation\", () => {",
    "    })",
    "" },",
    "" methods: {},",
    "" components: { Fragment },",
    ""}",
    ""</script>"
  ]
}
```
