setup mod for linux

Installer steamtinkerlaunch

```
git clone https://github.com/sonic2kk/steamtinkerlaunch.git
cd steamtinkerlaunch
./steamtinkerlaunch compat add
```

Dans steam sur skyrim -> propiété -> compatibilité -> choisir ... -> steamtinkerlaunch

Installer mod manager 2

cliquer sur le bouton mod organiser 2, ca va l'installer tout seul.

ensuite quitter mo2. Puis game menu -> changer pour lancer le jeu avec mo2

Fix voix personnages

https://steamcommunity.com/app/489830/discussions/0/3441214221459912300/

1.

```
WINEPREFIX=$HOME/.steam/steam/steamapps/compatdata/<id_wine>/pfx winetricks --force xact
```

2. Configure wine by running "WINEPREFIX=$HOME/.steam/steam/steamapps/compatdata/<id_wine>/pfx winecfg". In config window, click libraries tab. Then add xaudio2_6, and xaudio2_7 and set them both to native
3. Download the latest FAudio build from https://github.com/Kron4ek/FAudio-Builds/releases, and untar. 4. Cd to the folder with extracted files (it should have the wine_setup_native script in it), and run "WINEPREFIX=~/.steam/steam/steamapps/compatdata/<id_wine>/pfx bash wine_setup_native"

ps: vous pouvez trouver l'id wine en cliquant dans steamtinkerlaunch -> re-create wineprefix

Fix fullscreen

A coté du bouton "lancer" (en haut a droite) choissisez skyrim launcher.
